7. **Tinner Hill**
8. **South Washington** -- Finally the van takes everyone back to the school.

Discussion Questions:

1. **Setbacks:** Compare the form/shape of the street trees on W Broad from Haycock to Spring and Virginia to Washington (buildings have 1-2 stories next to the street) with the form/shape of the street trees next to taller buildings (Spectrum, Broadway and Byron) that have similar setbacks.
2. **Consistency:** How much do you notice/like/dislike any differences between the shrubs and flowers in the street planters on W Broad from one building to the next? How much do you notice/like/dislike the continuity of tree species in the same street planters?
3. **Planter size:** Note that mature trees completely fill the planter widths in the 100-200 block of W Broad
4. **Pedestrian ambience:** Compare the Brown's side of W Broad with the 4 Ps side - What do you like/dislike about walking next to planters vs. walking where there are no planters, and walking within the different setback widths?
5. **Planter protection:** Compare the appearance and condition of the soil and plants in standard raised-edge planters on W Broad with those in edgeless planters like at Pearson Square/Tax Analysts on S Maple.
