Subject: Environmental Sustainability Council Suggestion - FCCPS Strategic Plan

Attention: External E-mail – regardless if the sender is known DO NOT open any attachments or links unless you are expecting them from the sender

Dr Noonan -

The Environmental Sustainability Council of the City of Falls Church would like to make a suggestion for inclusion in the FCCPS Strategic Plan. We feel the schools could benefit significantly from a closer working relationship with City government in general, and especially with the Boards and Commissions who advise City Council. Board and Commission members have strong influence on policy development in the community, and are a resource of considerable expertise. We hope you will consider adding a statement to this effect to your new strategic plan.

"Work closely with the Falls Church City government to make use of available expertise, resources, vehicles, and funding to ensure students are educated in innovative, energy efficient, healthy, and sustainable facilities and transportation."

Thanks for your consideration.

Best Regards,

Andy Young
Chair, ESC
